ARCHITECTURE**

U.F.A.

I sogni dei bambini sono libertà e ispirazione. Sognano: immaginano nuovi spazi senza limiti, più fantasiosi e adatti alla loro crescita. Al risveglio, trasformano questi spunti in gioco e sperimentano con gli oggetti reali le varie possibilità di comporre e ricomporre i volumi creando costruzioni che impegnano fantasia e manualità, rischio, felicità e rigore.

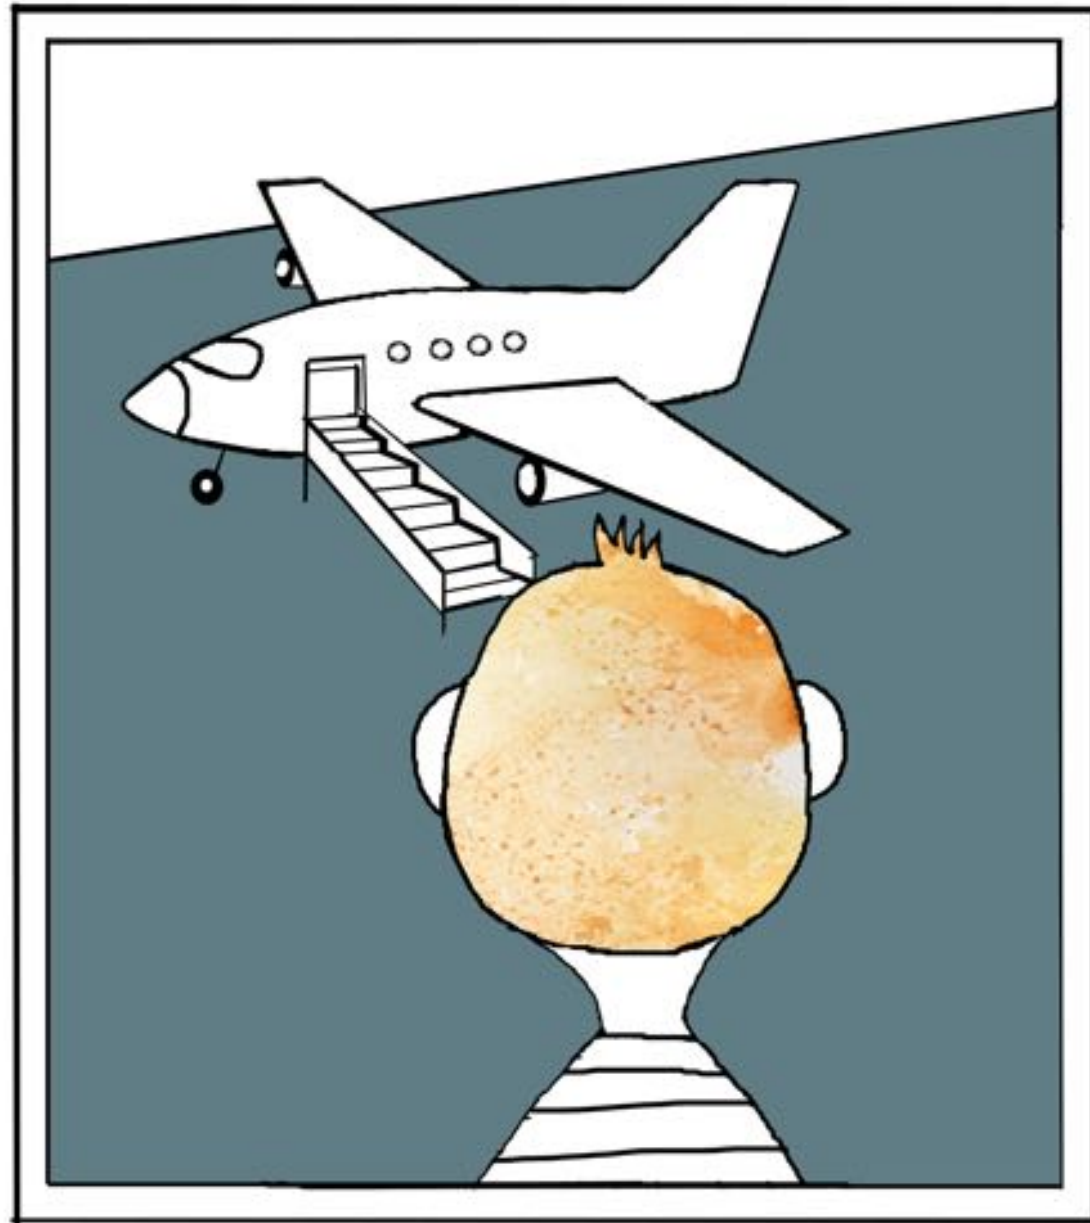

Anche così... nasce l'architettura.
